Honda's awesome CBR®600RR strikes a perfect balance between performance and handling in a middleweight package. The CBR600RR comes equipped with Honda's Dual-Stage Fuel Injection, a race-bred twin-spar aluminum frame, and dual radial-mounted four-piston front disc brakes. You can opt for Honda's electronically controlled C-ABS™ braking as well, the first ever on a production Supersport motorcycle.
Key Features

- Like the CBR1000RR, the CBR600RR is equipped with Honda’s Dual-Stage Fuel Injection. Two sets of injectors per cylinder ensure both low- and high-rpm performance. You get near instantaneous high-rpm response, along with great low-rpm metering and clean running.

- The Unit Pro-Link® suspension eliminates the frame-mounted top shock mount, isolating the chassis from bumps, resulting in more precise handling and better traction.

- The Honda Multi-Action System (HMAS) cartridge fork features an exclusive internal piston construction. The innovative design employs smaller-diameter pistons to keep oil velocity high for improved damping characteristics and an expanded range of adjustability. So you get more precise suspension performance, especially over smaller surface irregularities.

- The CBR600RR’s fuel tank is positioned in the center of the chassis and low in the frame. This allows for a more compact design, but even more importantly it helps centralize the bike’s mass, making the CBR more responsive to rider input.

Special Features

- Honda Electronic Steering Damper™ (HESD™) on the CBR600RR helps maintain smoothly predictable high-speed handling and low-speed maneuverability.

- The electronically controlled Combined ABS distributes brake force over both wheels, helping to maintain braking confidence in less than ideal conditions.

Color Options

- Red/White
- Black

Specifications

- Engine: 999cc liquid-cooled inline four-cylinder
- Fuel System: Dual Stage Fuel Injection (DSFI) with 40mm throttle bodies, Denso 12-hole injectors
- Transmission: Close-ratio six-speed
- Driveline: #525 O-ring chain
- Front Brake: Dual radial-mounted four-piston calipers with 310mm discs (Optional C-ABS)
- Rear Brake: Single 220mm disc (Optional C-ABS)
- Wheelbase: 53.9 inches
- Seat Height: 32.3 inches
- Fuel Capacity: 4.8 gallons, including 0.9-gallon reserve
- Curb Weight: 410 lbs. / 434 lbs. (C-ABS)
- Mileage Estimate: 40 MPG
- Colors: Red/White, Black / Black (C-ABS)

* Includes all standard equipment, required fluids and a full tank of fuel.

** Honda’s fuel economy estimates are based on EPA exhaust emission measurement test procedures and are intended for comparison purposes only. Your actual mileage will vary depending on how you ride, how you maintain your vehicle, weather, road conditions, tire pressure, installation of accessories, cargo, rider and passenger weight, and other factors.

Honda Genuine Accessories™

- Seat Cowl: Custom-shaped seat cowl adds a more aggressive look and increases lockable cargo capacity to four liters.
- Carbon Fiber Tank Trim: Made of real carbon fiber, features the Honda Racing logo, a glossy UV-resistant top coat and 3M™ adhesives.
