2023 Talon 1000XS/ Fox Live Valve

# HONDA

Talon 1000XS

**Talon 1000XS Fox Live Valve** 

# **FEATURES & BENEFITS**

### **POWERFUL 999cc TWIN-CYLINDER ENGINE**

Set longitudinally in the chassis and managed by our sophisticated PGM-FI engine-mapping system, the Talon 1000XS's 999cc liquid-cooled inline twin delivers the kind of powerful torque and quick-revving horsepower you want.

### **FOX LIVE VALVE SUSPENSION**

The Talon 1000XS FOX Live Valve features 2.5-inch shocks on all four wheels. The system adjusts damping on each shock independently, automatically, and up to 200 times a second for superior ride quality and less pitch and roll.

# **AUTOMATIC SIX-SPEED DCT TRANSMISSION**

Choose between manual or fully automatic. With DCT you control what engine speed and gear ratio you want, or you can let it do all the thinking for you. You also get genuine engine braking and more efficient power delivery than a belt-driven CVT.

### **DRIVER/PASSENGER PROTECTION**

Large-diameter tubing meets ISO's rollover protection standard. The standard-equipment hard doors and quick-clip side nets help keep debris from entering the cabin. Auto-style three-point seatbelts help optimize passenger security.
