Always check the Owner’s Manual for more operating and safety information.
Travel Trunk & Saddlebags

- GL1800/D/DA equipped with the travel trunk, saddlebags and fairing pocket.
- GL1800B/BD equipped with the saddlebags and fairing pocket.

To Open the Travel Trunk and Saddlebags

1. Make sure the Honda SMART Key is activated, and then enter the operating range with the Honda SMART Key.

   Each compartment can be opened when the Honda SMART key is within the shaded area as shown.

   2. To open the travel trunk, press the travel trunk release button.
      - The travel trunk unlocks and can be opened.
   3. To open the saddlebags, press the saddlebag release button.
      - Each saddlebag unlocks and opens.

To Close the Travel Trunk & Saddlebags

To close a compartment, place your hands flat on the edges of its lid and press down until it is firmly closed. Make sure the travel trunk and saddlebags “OPEN” indicator is not blinking before riding.

Fairing Pocket

To Open the Fairing Pocket

1. Make sure the Honda SMART Key is activated, and then enter the operating range with the Honda SMART Key.
2. To open the fairing pocket, press the fairing pocket opener.
   - The fairing pocket unlocks and can be opened.

   Take care not to store the deactivated Honda SMART Key in the fairing pocket.

   For the refueling procedure, refer to the Owner’s Manual.

To Close the Fairing Pocket

To close the fairing pocket, push the lid until it is firmly closed.
- Do not store valuables in the fairing pocket.
- Make sure the fairing pocket is closed before riding.

Refueling

Opening the Fuel Fill Cap

1. Open the fuel pocket.
2. Slide the fuel lid opener to open the fuel lid.
3. Turn the fuel fill cap counterclockwise and remove it.

Closing the Fuel Fill Cap

1. After refueling, be sure to tighten the fuel fill cap firmly by tighten it clockwise until it clicks.
2. Close the fuel lid by pushing it until it locks.
3. Close the fairing pocket.

Always check the Owner’s Manual for more operating and safety information.
Walking Speed Mode (GL1800BD/D/DA)

The Walking Speed mode assists the rider with getting the motorcycle into or out of tight areas by maneuvering the motorcycle at slow speed.

1. Sit astride the motorcycle, in your normal riding position, with both feet on the ground.
2. Make sure the transmission is in neutral (N indicator is on) and the side stand is up.
3. Start the engine.
   - For the engine starting procedure, refer to the Owner’s Manual.
4. Press the Walking Speed mode switch while applying the brake lever or pedal. The Walking Speed mode indicator is displayed.

   - It may take a few seconds before the motorcycle starts to move.
   - When the engine is stopped in Walking Speed mode, the clutch will disengage. This will cause the motorcycle to abruptly lose traction.
   - While in Walking Speed mode, do not press the engine stop switch except in an emergency. This will cause the motorcycle to abruptly lose traction.

5. To move the motorcycle backward, press and hold the shift down switch (-), and then release the brakes. To move the motorcycle forward, press and hold the shift up switch (+), and then release the brakes.
   - The motorcycle will move forward/backward as long as you hold one of the shift switches.
   - When the shift up switch (+) (forward) is pressed, “F” is displayed on the gear position indicator. When the shift down switch (-) (backward) is pressed, “R” is displayed on the gear position indicator.

6. To stop the motorcycle, apply the brake lever or pedal.
7. To end Walking Speed mode, apply the brake lever or pedal. After the motorcycle has stopped, press the Walking Speed mode switch while operating the brake lever or pedal, or press the N switch. Make sure the Walking Speed mode indicator turns off and the N indicator comes on.

8. After your motorcycle has stopped, press the Reverse mode switch to turn off the system. Make sure the N indicator comes on.

Moving in Reverse (GL1800)

Your motorcycle’s reverse system allows you to back out of a parking space at slow speed. Make sure there are no obstacles or people in the direction of travel. Avoid steep or uneven surfaces. Carrying a passenger while reversing is not recommended because it makes balance and control more difficult to maintain.

1. Sit astride the motorcycle, in your normal riding position, with both feet on the ground.
2. Make sure the transmission is in neutral (N indicator is on) and the side stand is up.
3. Start the engine.
   - For the engine starting procedure, refer to the Owner’s Manual.
4. Press the Reverse mode switch to turn on the reverse mode.
   - If the engine is not running, the reverse system cannot be activated.
5. When you are ready to back up, press and hold the Reverse button.
   - The motorcycle will move in reverse as long as you hold the button down. (“R” is displayed on the gear position indicator.) To prevent battery discharge, do not press the Reverse button more than 1 minute.
6. To stop the motorcycle, apply the brake lever or pedal.
7. Guide the motorcycle backward cautiously, using your legs to maintain balance. Use extreme care to maintain balance while reversing on loose surfaces (sand, dirt, gravel) or slick pavement.
8. Release the Reverse button, and the motorcycle will stop.

Always check the Owner’s Manual for more operating and safety information.
The audio system features navigation system, AM/FM radio, audio player (iPhone®, iPod®, USB flash drive or Bluetooth® device), Apple CarPlay™ and Bluetooth® Handsfree Calling. For operations, settings and connections of each mode, refer to the Owner’s Manual.

Home Screen
When the ignition switch is turned ON or ACC, the CAUTION message appears on the screen for a few second. Then the Home screen appears. From this screen, you can go to various functions and setup options.

- Clock (12-hour display)
- Audio Source
- Enters the current audio mode.
- Navigation
- Displays the navigation screen.
- Phone
- Enters the phone screen.
- Vehicle Setting
- Enters the vehicle setting menu screen.
- Audio Setting
- Enters the audio setting menu screen.
- Apple CarPlay
- Appears the menu icon when Apple CarPlay is available.

To Change the Audio Mode
Press switch to change the audio mode. Cycles through the audio modes on the information bar as follows: [FM] → [AM] → [SXM] (option) → [USB] → [iPod] → [Bluetooth] → [AUX] (option)

To Adjust the Volume
You can adjust the volume settings for the speakers and headsets separately. The system has following unique volume levels. Adjust the volume while in the individual modes.

When you push VOL lever up or down, the volume control level appears on the information bar.

The navigation system is a highly-sophisticated yet easy-to-use system with visual and voice guidance that uses satellites and a map database to show you where you are and help guide you to a desired destination.

### Map Menu
Display the map screen and operate the navigation features.
Select [Navigation] on the Home screen, then press (Enter) on the center panel or press switch on the left handlebar.
The map menu will be displayed on the bottom of the maps screen.

### Map Scroll
Move the interface dial up, down, left, right and on diagonals to scroll the map.

### Zoom In/Out
Rotate the interface dial clockwise/counterclockwise to zoom in or out of the map.

### Navigation Menu
Use main navigation functions, change settings and view useful information.
From the map menu, select [Menu]. The navigation menu will be displayed.

- **Go Home**
  Sets the route to your home location.

- **Destination Input**
  Selects your destination by selecting one of your favorite destinations or recent destinations, selecting a point of interest, entering an address, or selecting a location on the map.

- **Emergency**
  Searches for emergency services or displays information about your current location.

- **Routes**
  Creates and saves the route with multiple destinations, or edits the current route.

- **Information**
  Displays the different information.

- **Setup**
  Customizes the settings related to the navigation function.

### During Route Guidance

#### Map Screen (Route List Mode)
- **Calculated route**
- **Destination**
- **Next three maneuvers**
- **Travel distance**
- **Waypoint**
- **Street name**
- **Lane information**

#### Guidance Screen
- **Remaining distance**
- **Next maneuver**
- **Current location**
- **Central Ave**
- **Countdown bar**

* For safety reasons, some of the system operation and controls are automatically disabled while your motorcycle is in motion.
* Only the Navigation System’s handlebar controls and audio system controls continue to operate while riding.

Always check the Owner’s Manual for more operating and safety information.
